To Conduct Exploration*

**Notice of Operations for former
Drum mine**

5/027/05

RECEIVED

JAN 11 2005

DIV. OF OIL, GAS & MINING

I, Kenneth A. Skeem, a sovereign of the United States of America, according to the Constitution of America, and being the major holder of various current mining claims: UMC 370908, 370909, 370910, 371430, and 371437, do give notice of operations for the mining claims located on the former Drum mine site

The mine holders of these mining claims plan to reopen a right-of-way, to mine the gold ore which looks like Picture rock, near the pit beyond where Doug Jensen has thrown up a large burm. It will be necessary to remove this burm, to remove the ore efficiently. And we also plan to explore the two tunnels that you plan to close in the underground workings. It will be necessary for you to reopen these tunnels, in order for your to close them in as you propose to do (See copy of enclosed letter, certified number 7004 0750 0000 8259 6296.

We ask permission to examine these tunnels while they are open, to look for gold. We will also examine the tunnels at no charge to you for any abandoned electrical equipment which may contain toxic PCBs. We will report back to you, promptly, if any of this type of equipment remains in the mine. Your concerns for the environment would necessitate your removal of it. Also, if we find gold of sufficient quantities, we would want to, if possible, take over reclamation responsibilities pertaining to safety for the overhang and the two tunnels.

Also, gold has been located in the dirt and carbon in the old Western States/Jumbo pregnant pit. We plan to remove up to 40 yards of material to test it for value. We estimate that about 2.5 acres of land will be disturbed, as per this operation. Most of it will be in accessing the right-of-way to this property.

Thank you for you amiable attitude. I appreciate working with you.

Kenneth A. Skeem
